

George Whalin's Audio/Visual Needs

George brings his own Macintosh G4 Powerbook computer with remote control for electronic presentations. He will need for you to provide the following equipment:

- Projection Screen that is large enough to be seen by everyone in the audience. It is important that the bottom of the screen is visible from the back of the room.
- Small Table for George's equipment
- Cordless Lavalier Microphone
- LCD Projector for a Power Point presentation. The projector must be compatible with a Macintosh G4 Powerbook and have a minimum brightness of 2000 ANSI Lumens.

SET-UP AND A/V CHECK

George likes to run through his slides, check sound equipment, and become familiar with the layout of the room at least an hour prior to the presentation. If that's not possible and you would like to make other arrangements, please let us know.
